A schematic diagram of a mechanical assembly. It features a vertical support structure on the right. A horizontal arm is attached to this support. A curved, bracket-like component is mounted on the end of the horizontal arm. This bracket has two main sections: a lower section and an upper section. The lower section is connected to the arm via a pivot point. The upper section is connected to the lower section via a hinge. The entire assembly is shown in a perspective view.

This diagram shows an exploded perspective view of a door assembly. The components are labeled with circled numbers 1 through 8. 1 points to the door panel, 2 to the top hinge, 3 to the top hinge pin, 4 to the top hinge bracket, 5 to the top hinge pin, 6 to the bottom hinge, 7 to the bottom hinge pin, and 8 to the bottom hinge bracket. A dashed line indicates the path of the door panel as it moves from its closed position to its open position. A section line A-A is shown at the bottom right.
