**Transport Kit Policy**

If the transport kit will be kept longer than the stated terms of the invoice, payment needs to be received. Upon return of the kit, credit will be issued. If payment is not made, a 1% per month finance charge will be the responsibility of the dealer. When returning the kit please include the invoice number the kit was billed on. This will help establish the credit more quickly.

Light kits are available for \$200.00 credit upon return only. We would like to encourage our dealers selling several dryers per year to purchase a set of kits.

**Cancellations or Changes**

\$100.00 is charged to an order for any change made during production and \$1000.00 charge is issued for a dryer order cancellation during production.

**Fuel Surcharges**

Due to the rising cost of diesel fuel, beginning Monday April 19<sup>th</sup>, 2004, we are implementing a fuel surcharge that will be added to our base delivery freight charges. The fuel surcharge will be based on the U.S. Department of Energy's weekly national average for diesel fuel. This information can be viewed on their web site: <http://tonto.eia.doe.gov/oog/info/wohdp/diesel.asp>. The average price per gallon of fuel this week was \$1.679/gallon, which equates to a 6% surcharge. These prices are adjusted and posted each Monday and we will adjust our rate accordingly. Following is a chart of surcharge percentages related to diesel fuel pricing:

Price per Gallon Fuel		Surcharge
1.70	to 1.799	7%
1.80	to 1.899	8%
1.90	to 1.999	9%
2.00	to 2.099	10%
2.10	to 2.199	11%
2.20	to 2.299	12%
2.30	to 2.399	13%
2.40	to 2.499	14%
2.50	to 2.599	15%
2.60	to 2.699	16%
2.70	to 2.799	17%
2.80	to 2.899	18%

**Dryer Freight Charges**

The following freight rates apply to GSI dryer shipments from Newton, Illinois:

**Pulled Dryers** - For 18' or shorter dryer baskets, the delivery of a single pulled dryer will be \$1.55 per mile. For pulled dryers longer than 18' basket, the delivery charge will be \$2.10 per mile. (The recommended transport kit will be required on all pulled dryers)

**Hauled Dryers** - The delivery of any hauled dryer or dryers to a single dealership will be \$2.10 per mile per trailer load. (Note: Two dryers with a total basket length of 36' or less can be hauled on the GSI dryer trailer. Three dryers with a total basket length of 30' or less can be hauled on the GSI dryer trailer)

**Hauled Dryers, Split Loads Between Different Dealers 150 Mile Radius of Each** - The delivery of a dryer(s) combined with another dryer(s) from a different dealer will be \$1.25 per mile per dealership. (Note: Two dryers with a total basket length of 36' or less can be hauled on the GSI dryer trailer. Three dryers with a total basket length of 30' or less can be hauled on the GSI dryer trailer)

**PGC PNEUMATIC GRAIN CLEANER**

**Benefits of the PGC include:**

Removal of light foreign material occurs at the most optimum moment, when grain is in suspension.  
 Removing light materials improves air flow during storage aeration.  
 Removing bees' wings (red dog) reduces the potential of plugged aeration floors, elevator leg boots, heads, and distributors.  
 Removing some foreign material increases grain quality and reduces possible dockage at the elevator.  
 Low cost, low maintenance, high return.

GSI PGC can also be adapted to other areas of the grain system to increase the cleaning potential.  
 Less bees' wings (red dog) and foreign matter around the drying facility results in a cleaner, more desirable working atmosphere.
