Motomco® Model 919 Moisture Meter Calibration Charts*

Charts are intended for use within the following limitations:

1. **Sample temperature range: 40°F to 99°F**
2. **Meter temperature: 60°F to 85°F**
3. **Maximum difference between sample temperature and meter temperature: 20°F**
4. **Power requirements: 117VAC ± 10% (short-term stability ± 5%) at 60Hz ± 0.5**
5. **Electromagnetic field exposure: 1V/m maximum**

If you cannot find a chart you are looking for on this web page, [please contact us](#).

**For Canadian Charts please see [Canadian Grain Commission](#) conversion charts.
