Regarding: 10" Bin Flange used with 10" Chain Loop Systems

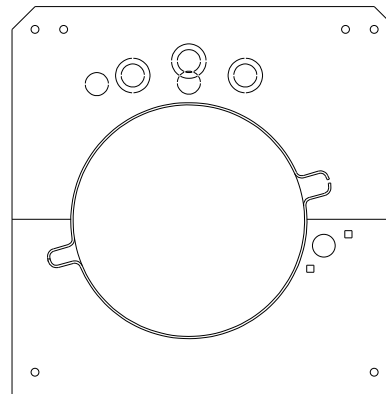

It was brought to my attention that there are alignment issues with the current 10" Bin Flange (GK1056) when used with the 10" Chain Loop Intermediate & center wells. To correct this problem, I have created a new 10" Bin Flange (**8101318**) to be used with the 10" Chain Loop System. The new number is effective immediately.

In the price catalog, 10" Chain Loop Section under Accessories, please replace GK1056 with **8101318**.

The new 10" Bin Flange **8101318** offers 1.00" & 1.50" knockouts for well gate control rods. The price will remain the same at \$48.54.

NEW 10" Bin Flange
for 10" Chain Loop Systems
8101318

Previous 10" Bin Flange
for 10" Chain Loop Systems
GK1056
